

Pay this unit off in as little as 10 weeks with 70% utilization – no commission necessary – paying pennies for pharma grade salt!

Halogenerator in photo is a Halo GX.

Himalayan Salt Pod

Convenient, quick and positively impactful for your pulmonary health! No need to undress or change clothes, simply sit and inhale deeply in a comfortable environment rich with the benefits of halotherapy.

A 30-minute Himalayan Source salt pod session gives time for meditation or, for busy professionals, to stay in business attire, make phone calls, conduct a Zoom meeting or answer emails. Use the time as desired – while you breathe in the pharmaceutical grade salt dispensed by the halogenerator!

HOW DOES HALOTHERAPY WORK?

Halotherapy uses a natural, basic mineral – pure sodium chloride (salt). Sodium chloride is an essential element for the regulation of mucus in the lungs and upper respiratory system. It cleanses the respiratory tract and strengthens lung function by stimulating the body's internal processes.

Simply inhale and exhale while in the halotherapy room. The tiny, negatively ionized salt micro-particles will help improve your breathing and more.

Safe, 100% natural and healthy – Halotherapy improves breathing and achieves symptomatic relief from respiratory and skin ailments.

- Cleanses the respiratory tract
- Improves lung function
- Strengthens the immune system
- Helps you breathe more easily
- Improves skin health
- Increases athletic performance

Salt pods start at \$8,500 and include 64"x84" salt wall (bench not included). Contact us for info and other sizes available with 2, 3 or 4 glass walls.

Customize your salt pod – ask about pricing.

- Add a halogenerator. Models available from \$650-\$5,000.
- Made-to-order salt walls to fit your environment.

Specs: 68"D x 102"L x 84"H

Use standard 34" wide panels to create rooms of various sizes in that increment. Custom sizes can be made with a longer lead time. May include up to 3 seats in a pod.

Comes ready to assemble (mounting hardware precut and ceiling panels already assembled) – ready to set in place.
