- wood ceiling, natural or white
- pink Himalayan salt wall with 4x8 bricks
- HaloGX Pro halogenerator

Comes ready to assemble with mounting hardware precut and ceiling panels already assembled — ready to set in place.

Himalayan Salt Pod

Convenient, quick and positively impactful for your pulmonary health!
No need to undress or change clothes, simply sit and inhale deeply in a comfortable environment rich with the benefits of halotherapy.

A 30-minute Himalayan Source salt pod session gives time for meditation or, for busy professionals, to stay in business attire, make phone calls, conduct a Zoom meeting or answer emails. Use the time as desired — while you breathe in the pharmaceutical grade salt dispensed by the halogenerator!

HOW DOES HALOTHERAPY WORK?

Halotherapy uses a natural, basic mineral — pure sodium chloride (salt). Sodium chloride is an essential element for the regulation of mucus in the lungs and upper respiratory system. It cleanses the respiratory tract and strengthens lung function by stimulating the body’s internal processes.

Simply inhale and exhale while in the halotherapy room. The tiny, negatively ionized salt micro-particles will help improve your breathing and more.

Safe, 100% natural and healthy — Halotherapy improves breathing and achieves symptomatic relief from respiratory and skin ailments.

- Cleanses the respiratory tract
- Improves lung function
- Strengthens the immune system
- Helps you breathe more easily
- Improves skin health
- Increases athletic performance

Salt pods start at \$12,900 (glass enclosure only). See opposite side for pricing and options that include pink backlit Himalayan salt wall.

Customize your salt pod — ask about pricing.
